IHI ??

The Institute for Healthcare Improvement (IHI):

At IHI, we believe these three rules:

- *1) health care systems can be sustained with modest annual cost increases;*
- *2) there is enough capacity in the systems to provide equitable, high-quality care to all; and*
- *3) solutions to national problems can be found and designed at a regional level.*

Triple Aim??

IHI is working with pioneering population-based care organizations to explore innovative designs with the potential to simultaneously:

- 1) improve the health of the population,
- 2) enhance the patient care experience,
- 3) and control per capita cost.
